

TELESTES.

An International Journal of Archaeomusicology and Archaeology of Sound

Editor in chief Angela Bellia, National Research Council, Italy

Editorial Board

Erica Angliker, University of London, United Kingdom; Eleonor Betts, The Open University, United Kingdom; Sheramy D. Bundrick, University of South Florida St Petersburg, United States of America; Licia Buttà, University of Tarragona, Spain; Margarita Díaz-Andreu, University of Barcelona, Spain; Ingrid Furniss, La Fayette College, Pennsylvania, United States of America; Agnès Garcia-Ventura, Universitat Autònoma de Barcelona, Spain; Michael Given, University of Glasgow, United Kingdom; Laura Gianvittorio-Ungar, Austrian Archaeological Institute of Wien, Austria; Audrey Gouy, University of Copenhagen, Denmark; Ewa Anna Gruszczynska-Ziółkowska, University of Warsaw, Poland; Raquel Jiménez Pasalodos, University of Barcelona-University of Valladolid, Spain; Cristina Manzetti, Foundation for Research and Technology - Hellas, Institute for Mediterranean Studies, Greece; Clemente Marconi, New York University, United States of America - University of Milan, Italy; Manolis Mikrakis, National Technical University of Athens, Greece; Steve Mills, University of Cardiff, United Kingdom; Dimitrij Mlekuz, University of Ljubljana, Slovenia; Riitta Rainio, University of Helsinki, Finland; Arnaud Saura-Ziegelmeyer, University of Toulouse ii Jean Jaurès, France; Karin Schapbach, University of Fribourg, Switzerland; Lamberto Tronchin, University of Bologna, Italy; Fábio Vergara Cerqueira, University of Pelotas, Brazil; Alexandre Vincent, University of Poitiers, France

Associate Editors: Arnaud Saura-Ziegelmeyer, University of Toulouse ii Jean Jaurès and Institut Catholique de Toulouse, France; Daniel Sánchez Muñoz, University of Granada, Spain

«Telestes» is a Double-Blind Peer-Reviewed International Scholarly Journal.

It is Indexed in erih Plus (European Science Foundation).

The eContent is Archived with Clocks and Portico.

CALL FOR PAPERS

«TELESTES» seeks to fill a gap in current scholarly publications and specialist periodicals on the archaeological evidence of musical and dance interest. It also aims to place musical and choral performances of the past into one clearly defined space and event in order to interpret their cultural significance, both religious and social, and to understand what music and making music and dance meant in ancient societies. Furthermore, the Journal publishes papers on the study of sound and hearing along with related sensorial aspects in archaeological contexts and on past soundscapes and sonic fabrics (anthrophony, biophony, and geophony): this includes subject areas that range from the behaviour of sound in a sonic space and aural architecture to auditory experience and physical acoustics, as well as auditory archaeology and the importance of sound as a medium of social interaction in the past.

The Journal welcomes research on the broadly defined Mediterranean region and from other areas of the world, such as North Europe, Central and South America, Africa, Southeast Asia, and the Pacific Rim. Contributions pertaining to different periods are welcome. Cross-disciplinary and multi-disciplinary approaches would be particularly appreciated.

The preferred language for the contributions is English, but other languages (including German, French, Italian and Spanish) are acceptable.

At this stage, the goal for the Journal is to publish one issue per year with 5-6 contributions, with a total of ca. 200 pp. The preferred length for the contributions is 8,000 words. The format of the Journal will be 21, 5x31cm. The Journal will be published in both print and digital formats, the former in black and white and the latter in colour. The digital issue will be available on www.libraweb.net. Manuscripts should be sent to angbellia@gmail.com and will be subject to peer review by two anonymous readers. The deadline for the submission of manuscripts is **31 December 2024**: <http://www.libraweb.net/riviste.php?chiave=147>
